

### AMENDMENTS TO CLAIMS

The below listing of claims replaces all prior listings of claims and versions in this application.

#### Listing of Claims

1. (Cancelled)

2. (Currently Amended) A computer readable medium encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the body of law comprising a plurality of topics and a plurality of parts, including parts that are different versions of each other, the one or more data structures comprising:

an association of each part of the body of law, including different versions thereof, and at least one topic, the association comprising a hierarchical arrangement of topics of the body of law and parts of the body of law in which each part of the body of law and any different version thereof and the associated at least one topic are hierarchically associated;

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of a respective part and ~~of the legal applicability of any~~ different version thereof, and the respective part of the body of law or respective different version thereof; and

an association of information relating to each part and version of the body of law and the at least one topic with which the respective part or version is associated.

3. (Cancelled)

4. (Currently Amended) A computer readable medium encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the one or more data structures-comprising:

one or more unique information units, each information unit including at least one part of the body of law, including ~~any~~ each different version of the at least one part, and a plurality of topical units, each topical unit comprising at least one topic arranged in a scheme for organizing a plurality of interrelated topics;

an association of each topical unit and ~~the~~ at least one information unit, each topical unit including information relating to the at least one information unit associated therewith; and

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of each part of the body of law and different version thereof, and the respective information unit in which information unit the respective part and ~~any~~ each different version thereof are included.

5. (Currently Amended) A computer readable medium according to claim 2, wherein ~~the~~ the one or more data structures enable computer access to a part or version of the body of law based at least on the temporal information associated therewith.

6. (Previously Presented) A computer readable medium according to claim 4, wherein the one or more data structures enable computer access to an information unit based at least on the temporal information associated therewith.

7. (Currently Amended) A computer readable medium according to claim 4, wherein the one or more data structures enable computer access to an information unit based at least on the temporal information associated therewith, directly or through a topical unit with which the information unit is associated.

8. (Previously Presented) A computer readable medium according to claim 4, wherein the association of each information unit and temporal information comprises each information unit including the associated temporal information.

9. (Previously Presented) A computer readable medium according to claim 4, comprising at least one link between each information unit and the temporal information associated therewith.

10. (Previously Presented) A computer readable medium according to claim 4, wherein each information unit comprises a structured document including a part or version of the body of law and the temporal information associated therewith.

11. (Previously Presented) A computer readable medium according to claim 4, wherein the one or more data structures comprises a relational database including records, and each information unit and the temporal information associated therewith are included in a respective record.

12. (Previously Presented) A computer readable medium according to claim 4, wherein the one or more data structures comprises a plurality of files, each file storing at least one information unit and the temporal information associated therewith.

13. (Previously Presented) A computer readable medium according to claim 4, wherein the one or more data structures comprises a plurality of files, each file storing at least one topical unit, each information unit associated therewith, and the respective temporal information associated with each information unit associated therewith.

14. (Cancelled)

15. (Cancelled)

16. (Previously Presented) A computer readable medium according to claim 4, wherein the one or more data structures comprises a hierarchical arrangement of topical units and associated information units.

17. (Previously Presented) A computer readable medium according to claim 4, wherein the association of the topical unit and the temporal information associated with at least one of the information units associated with the respective topical unit comprises the topical unit including the temporal information.

18. (Currently Amended) A computer readable medium according to claim 4, wherein the one or more data structures comprises a hierarchical organization comprising a topic tree that comprises a plurality of nodes including leaf nodes, with each node representing one of the topical units, ~~the tree having leaf nodes representing topical units, each topical unit being and~~

each leaf node representing an atomic topical unit that is not subdivided, and wherein each information unit associated with a respective topical unit is associated with the leaf node representing that topical unit.

19. (Previously Presented) A computer readable medium according to claim 4, wherein the one or more data structures comprises at least one table of contents (TOC) associated with the topical units, each TOC including a reference to each information unit associated with the respective topical unit.

20. (Previously Presented) A computer readable medium according to claim 2 or 4, wherein the temporal information includes a date range.

21. (Previously Presented) A computer readable medium according to claim 2, wherein the temporal information includes a date range, and wherein the one or more data structures enable computer access to a part or version of the body of law based at least on a date encompassed by the date range associated with that part of the body of law.

22. (Previously Presented) A computer readable medium according to claim 4, wherein the temporal information includes a date range, and wherein the one or more data structures enable computer access to an information unit based at least on a date encompassed by the date range associated with that information unit.

23. (Previously Presented) A computer readable medium according to claim 2 or 4, wherein the temporal information comprises a date range including a date on which the related part of the body of law is effective, and, if that part of the body of law has a date of termination, the date of termination.

24. (Previously Presented) A computer readable medium according to claim 2, wherein the temporal information comprises a date on which that part or version of the body of law was adopted.

25. (Previously Presented) A computer readable medium according to claim 4, wherein the temporal information comprises a date on which the part or version of body of law included in the respective information unit was adopted.

26. (Previously Presented) A computer readable medium according to claim 2 or 4, wherein the body of law includes at least one title of the United States Code.

27. (Previously Presented) A computer readable medium according to claim 2 or 4, wherein the body of law includes at least one title of the United States Code of Federal Regulations.

28. (Previously Presented) A computer readable medium according to claim 2 or 4, wherein the body of law includes at least one title of a codified set of laws of at least one state.

29. (Currently Amended) A computer readable medium encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the one or more data structures comprising:

a plurality of structured documents arranged in a hierarchy of documents comprising documents including a topic or topics of the body of law and documents including a part of the body of law;

an association of each of the documents including a part of the body of law and temporal information comprising one or more dates indicating the legal applicability of the respective part, wherein a plurality of the parts of the body of law each comprises at least one different version[[s]] of the same part of the body of law; and

each document that includes a part of the body of law including ~~any~~ a different version of that part of the body of law and the temporal information associated with the respective part or version.

30. (Previously Presented) A computer readable medium encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the one or more data structures comprising:

a plurality of lower-level structured documents;

an association of each of a plurality of parts of the body of law and temporal information comprising one or more dates indicating the legal applicability of the respective part, wherein a plurality of the parts of the body of law comprises different versions of the same part of the body

of law, the temporal information being different for different versions of the same part of the body of law;

each lower level structured document including a different part or different version of the same part of the body of law and including the associated temporal information; and

at least one higher level structured document, each lower level structured document being in a hierarchical relationship with at least one higher level structured document which higher level structured document includes information relating to the respective lower level structured document.

31. (Previously Presented) A computer readable medium encoded with one or more data structures representing an information collection related to a common subject, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the common subject, the one or more data structures comprising:

a plurality of lower level structured documents;

an association of each of a plurality of parts of the common subject and temporal information comprising at least one date indicating a state or status with respect to time of the respective part of the common subject, wherein a plurality of the parts of the common subject comprises different versions of the same part of the common subject, the temporal information being different for different versions of the same part of the common subject;

each lower level structured document including a different part or different version of the same part of the common subject and including the associated temporal information; and

at least one higher level structured document, each lower level structured document being in a hierarchical relationship with at least one higher level structured document which higher level structured document includes information relating to the respective lower level structured document.

32. (Previously Presented) A computer readable medium according to claim 30 or 31, wherein at least one higher level structured document includes a table of contents (TOC) including a reference to each lower level structured document associated therewith.

33. (Previously Presented) A computer readable medium according to claim 32, wherein at least one higher level structured document includes a TOC having a reference to at

least one other higher level structured document hierarchically related to the at least one higher level structured document in an ancestral/descendant relationship.

34. (Currently Amended) A computer readable medium according to claim 32, wherein at least one higher level structured document includes a TOC having a reference to at least one other higher level structured document and to each lower level structured document referenced by the at least one other higher level structured document, the at least one higher level structured document being hierarchically related in an ancestral/descendant relationship with the at least one other higher level structured document[[,]] and each of the lower level structured documents.

35. (Previously Presented) A computer readable medium according to claim 30 or 31, wherein at least one structured document indicates differences between different versions of the same part.

36. (Currently Amended) A computer readable medium encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the one or more data structures comprising:

a hierarchical arrangement of headings in at least one table of contents (TOC) and parts of the body of law including parts that are different versions of each other, each heading identifying one or more parts of the body of law;

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of a respective part and version of the body of law, and the respective part or version of the body of law;

an association of a plurality of parts of the body of law that are different versions of each other and have different temporal information associated therewith and at least one heading of a TOC; and

an association of the temporal information relating to each part and version of the body of law and each heading with which the respective part or version is associated.

37. (Cancelled).

38. (Previously Presented) A computer readable medium according to claim 36, wherein the one or more data structures enable computer access to a part of the body of law in response to a request by a computer including at least a date of the one or more dates associated with that part.

39. (Previously Presented) A computer readable medium according to claim 36, wherein the one or more data structures include a structured document for and including each different part of the body of law.

40. (Previously Presented) A computer readable medium according to claim 39, wherein each TOC is included in a structured document having a reference to each other structured document including a part of the body of law referenced in a heading of that TOC.

41. (Cancelled)

42. (Cancelled)

43. (Cancelled)

44. (Cancelled)

45. (Cancelled)

46. (Currently Amended) An information storage and retrieval system, comprising:  
a computer system including a computer display device, a computer input device and a computer-readable medium, the computer system being coupled to access data stored on the computer-readable medium;

wherein the medium is being encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating access by the computer system of information from the medium relating to the body of law, the one or more data structures comprising:

an association of each part of the body of law, including different versions thereof, and at least one topic comprising a hierarchical arrangement of topics of the body of law and parts of the body of law in which each part of the body of law and any each different version thereof and the associated at least one topic are hierarchically associated; and

an association of temporal information, which temporal information comprises  
~~comprising~~ one or more dates indicating the legal applicability of a respective part and the legal

~~applicability of any~~ different version thereof, and the respective part of the body of law or respective different version thereof;

wherein the computer system ~~is being~~ programmed to access the medium and cause to be displayed on the computer display device, in response to input from the computer input device, information identifying at least two parts of the body of law that are different versions of each other together with temporal information associated therewith, and in response to input from the computer input device selecting one of the identified parts to access the medium and cause the one identified part to be displayed on the display device.

47. (Previously Presented) An information storage and retrieval system, comprising:  
a computer system including a computer display device, a computer input device and a computer-readable medium, the computer system being coupled to access data stored on the computer-readable medium;

the medium being encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating access by the computer system of information from the medium relating to the body of law, the one or more data structures comprising:

a hierarchical arrangement of headings in at least one table of contents (TOC) and parts of the body of law, each heading identifying one or more parts of the body of law;

an association of temporal information comprising one or more dates indicating the legal applicability of a respective part of the body of law and the respective part of the body of law;  
and

an association of a plurality of parts of the body of law that are different versions of each other and have different temporal information associated therewith and at least one heading of a TOC;

the computer system being programmed to access the medium and cause to be displayed on the computer display device, in response to input from the computer input device, at least one heading, at least one part associated with the at least one heading and temporal information, and the computer system being programmed to cause to be displayed on the computer display device a displayed part selected with the computer input device that has temporal information associated therewith that encompasses the displayed temporal information.

Claim 48. (Canceled).

Claim 49. (Canceled).

50. (Currently Amended) A method of accessing an information collection stored on a computer readable medium using a computer coupled to access the information collection, the medium being encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating access by the computer system of information from the medium relating to the body of law, the one or more data structures comprising:

an association of each part of the body of law, including different versions thereof, and at least one topic comprising a hierarchical arrangement of topics of the body of law and parts of the body of law in which each part of the body of law and any each different version thereof and the associated at least one topic are hierarchically associated; and

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of a respective part and ~~the legal applicability of any~~ different version thereof, and the respective part of the body of law or respective different version thereof;

the method comprising:

displaying on a computer display device coupled to the computer dates in association with information identifying at least two parts that are different versions of each other; and

displaying on the computer display device that part of the body of law that is selected with a computer input device coupled to the computer.

51. (Currently Amended) A method of accessing an information collection stored on a computer readable medium using a computer coupled to access the information collection, the medium being encoded with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating access by the computer system of information from the medium relating to the body of law, the one or more data structures comprising:

an association of each part of the body of law, including different versions thereof, and at least one topic comprising a hierarchical arrangement of topics of the body of law and parts of the body of law in which each part of the body of law and any each different version thereof and the associated at least one topic are hierarchically associated; and

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of a respective part and ~~the legal applicability of any~~ different version thereof, and the respective part of the body of law or respective different version thereof;

the method comprising:

inputting to the computer using a computer input device information identifying a part of the body of law and a date; and

in response thereto, the computer causing the computer display device to display the identified part which has temporal information encompassing the inputted date.

52. (Original) A method according to claim 50, wherein the information collection includes a table of contents (TOC) having headings with which one or more parts of the body of law are associated, each heading being associated with temporal information indicating the applicability of parts associated with the respective heading, the method comprising:

displaying on the computer display device a heading and the temporal information associated therewith;

inputting to the computer using a computer input device a selection of displayed temporal information associated with a heading; and

in response thereto, displaying on the computer display device the part of the body of law in the displayed heading associated with the temporal information that is selected using the computer input device.

53. (Previously Presented) A method of providing the one or more data structures of claim 4 comprising:

- associating each information unit with applicable temporal information;
- organizing the information units into topical units at least one of which includes the plurality of information units having different versions of the same part of the body of law; and
- configuring the one or more data structures to provide access by a computer, in response to at least one request input to the computer identifying a topical unit and a date, to an information unit of the identified topical unit having temporal information associated therewith that encompasses the date.

54. (Previously Presented) A method of providing the one or more data structures of claim 30, comprising:

- associating each part of the body of law with applicable temporal information;
- including each part of the body of law and its associated temporal information into a lower level structured document;
- associating applicable lower level structured documents with a higher level structured document;
- including in each higher level document information relating to each lower level document associated therewith; and
- configuring the one or more data structures to provide access by a computer, in response to at least one request input to the computer identifying a part of the body of law and a date, to a structured document including the identified part and temporal information associated therewith that encompasses the date.

55. (Cancelled)

56. (Currently Amended) A method for encoding a computer readable medium with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the body of law comprising a plurality of topics and a plurality of parts, including parts that are different versions of each other, the method comprising creating in the one or more data structures:

an association of each part of the body of law, including different versions thereof, and at least one topic in a hierarchical arrangement of topics of the body of law and parts of the body of law in which each part of the body of law and ~~any~~ each different version thereof and the associated at least one topic are hierarchically associated;

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of a respective part and ~~the legal applicability of any~~ different version thereof, and the respective part of the body of law or respective different version thereof; and

an association of information relating to each part or version of the body of law and the at least one topic with which the respective part or version is associated.

57. (Currently Amended) A method for encoding a computer readable medium with one or more data structures representing an information collection comprising a body of law, the one or more data structures organizing the information collection and facilitating computer access from the computer readable medium of information relating to the body of law, the method comprising creating in the one or more data structures:

one or more unique information units, each including at least one part of the body of law including any each different version of the at least one part, and a plurality of topical units, each comprising at least one topic;

an association of each topical unit and the at least one information unit, each topical unit including information relating to the at least one information unit associated therewith; and

an association of temporal information, which temporal information comprises ~~comprising~~ one or more dates indicating the legal applicability of each part of the body of law

and different version thereof, and the respective information unit in which the respective part and any different version thereof are included;

the method comprising storing the one or more data structures in the computer readable medium.

58. (Previously Presented) A computer readable medium according to claim 2, wherein the information relating to each part of the body of law associated with at least one topic comprises the temporal information.

59. (Previously Presented) A computer readable medium according to claim 4, wherein the information relating to each information unit associated with at least one topical unit comprises the temporal information.

60. (Previously Presented) A computer readable medium according to claim 2, wherein the association of the information relating to each part of the body of law and at least one topic comprises the at least one topic including such information.

61. (Previously Presented) A computer readable medium according to claim 4, wherein the association of the information relating to each information unit and at least one topical unit comprises the at least one topical unit including such information.
